Vacancy details

We are looking for a software developer in Tbilisi.

The tasks will be to further develop an existing streaming application, as well as development of corresponding TV apps (Android,/fireTv, Smart Tv). We use React or React Native in almost every project and would like to continue to do so.

Requirements of the Developers:

* Excellent /Very Good English skills (text and talk)

* Good Hands on Experience in either Android/iOS development

* Experience in Agile development environment

* Optional : Prior Experience in Development of either React or React Native apps.

Soft skills like the ability to work in a team in mandatory of course. Diplomas are not that important; the competence of the developers count and also their attitude towards achieving ambitious goals.

The company will regularly offer continuing education in the corresponding fields of the respective position. Office wise we will have a beautiful space with lounge, bar and a gaming room.
